COMPANYPROFILE

When you need Data analysis, business intelligence consulting and data warehousing services that will elevate your business, MIG is the clear choice.

ABOUT US

At MIG, we help businesses make better decisions. We provide expert data analysis, business intelligence and data warehousing services that help clients optimize their ability to leverage data and turn it into actionable insight.

Working as a collaborative partner, we see the big picture, ask the right questions and look for our clients' underlying business challenges. Then we deliver solutions that lay the foundation for a tangible competitive advantage. And because we don't favour a particular platform or vendor, we are able to provide the solution that best fits each client's needs.

In addition to providing Data Analysis and Business Intelligence consultants with business insight, we provide industry-specific insight into our clients' business issues. Our experience and deep industry knowledge allows us to rapidly develop effective solutions to help customers address and solve some of their most pressing challenges.

MIG's mission is to improve the quality of analysis; combining the best sources of information with the right methods of analysis to help clients answer their toughest questions.

To evolve from a 'number crunching' entity to a business with diverse products able to add value for customers.
